Objective:
Practice interpreting and critiquing game rules.

What to do:
Your will receive a copy of another team's rules for the enhanced "Dots and Boxes" game. Play the game according to the rules several times.
Write a short 2 page (500 word) analysis of the rule set:
• Were the rules easy to follow and understand? Did you have to use your prior knowledge of the game in order to play or were the instructions complete? Did questions arise during play the instructions did not resolve?
• Did the rule enhancements achieve the desired goals of (a) adding randomness and (b) allowing the grid to change shape? Did these changes make the players' choices more or less meaningful?
• Was the game fun to play? Why or why not? Are these new rules an improvement on the standard "Dots and Boxes" game?

What to turn in:
Have one group member turn in an electronic copy of your analysis to Course On-Line. Be sure that the paper is clearly marked with the names of the group members.
